# SOLUTIONS

In this section you can choose to put any text you want, it can be a more serious text like this is the part where you can see the solutions calmly to correct or try to find that number that resists you.

But you can also put a more humorous text saying that this is the section that you will recognize you never wanted to look at but had to do it.

Or simply you don't put anything and the title SOLUTIONS will appear in the language chosen for your book.
